

REPAIR AND RECLAMATION

(C-130H)

1. Objective. As prescribed in AFI 38-201, *Determining Manpower Requirements*, this Air National Guard Manpower Standard (ANGMS) quantifies the full-time manpower required to accomplish the tasks described in the work center description for varying levels of workload volume.

2. Authority. The AFI 21-series of Air Force (AF) and/or Air National Guard (ANG) directives contain US Air Force and Command policy and procedural guidance for the Repair and Reclamation work center. This manpower standard was developed using the functional review process under procedures outlined in AFPAM 38-208V1, *Air Force Management Engineering Program (MEP) Processes*, formerly AFR 25-5.

3. Applicability. This standard applies to all Air National Guard C-130H airlift units except the 109th and 139th Airlift Groups, the 123rd Airlift Wing, and the 176th Composite Group. This standard only applies to peacetime operations.

4. Standard Data:

- a. Classification. Type II.
- b. Approval Date. 9 July 1992.
- c. Man-hour Data Source. Operational Audit method (historical record and technical estimate techniques).
- d. Standard Man-hour Equation. $Y = -49.28 + 1.121X$.
- e. Workload Factor:
 - (1). Title. A C-130H Programmed Flying Hour.
 - (2). Definition. The average monthly programmed flying hours.
 - (3). Source. USAF Program Document, Volume II, maintained by NGB/FM.

5. Application Instructions:

- a. The valid man-hour range for this ANGMS is 196.51 through 343.63.
- b. This ANGMS is appropriate for use with all peacetime civilian man-hour availability factors.
- c. Refer to the appropriate column in the standard manpower table at attachment 2 to determine the skill distribution.
- d. Should the extrapolation limits be exceeded, see AFI 38-201, *Determining Manpower Requirements*, for guidance.

6. Statement of Conditions:

- a. There were no general conditions (environmental, equipment, or facility) which had an impact on the development or application of this manpower standard.
- b. There were no approved enhancements that impacted the man-hour equation for this work center.
