

WEAPONS LOADING, WEAPONS RELEASE, AND GUN SERVICES
GENERAL PURPOSE
F-15

1. Objective. As prescribed in AFI 38-201, *Determining Manpower Requirements*, this Air National Guard Manpower Standard (ANGMS) quantifies the full-time manpower required to accomplish the tasks described in the work center description at attachment 1 for varying levels of workload volume.

2. Authority. ANGI 21-101, *Maintenance Management of Aircraft*, contains policy and procedural guidance for the Weapons Loading, Weapons Release, and Gun Services function. This ANGMS has been developed in accordance with functional review procedures contained in AFMAN 38-208V1, *Air Force Management Engineering Program (MEP) Processes*.

3. Applicability. This ANGMS applies to all ANG F-15 General Purpose Fighter Wings and Groups in peacetime operations only.

4. Standard Data:

- a. Classification. Type II.
- b. Approval Date. 2 February 1995.
- c. Manpower Data Source. Operational Audit method (historical record and technical estimate techniques).
- d. Standard Manpower Equation. $Y = 629.0 + 8.851X$.
- e. Workload Factor:
 - (1) Title. A Sortie Flown.
 - (2) Definition. The average monthly number of sorties flown by F-15 aircraft.
 - (3) Source. USAF Program Document, Volume II, maintained by ANG/FM will be used to obtain programmed flying hours. See paragraph 5, Application Instructions, to calculate sorties.

5. Application Instructions:

- a. The valid man-hour range for this ANGMS is 2078.15 through 4374.43.
- b. This ANGMS is appropriate for use with all peacetime civilian man-hour availability factors.
- c. To determine the monthly number of sorties, refer to ANG/XOOO to obtain the average sortie duration (ASD). The ASD is maintained in the computerized historical files for each aircraft by year. Divide programmed flying hours by the ASD which will yield predicted sorties. Substitute this value into the equation for X. The resultant number will be divided by the current civilian man-hour availability factor which will produce fractional manpower requirements. Use the fractional manpower table provided by ANG/MPME to determine requirements.
- d. Refer to attachment 2, AF Form 1113, Standard Manpower Table, to determine specific Air Force specialties.

6. Statement of Conditions. The conditions listed below had no effect on the development of the standard, nor will they affect future applications. Analyses of these levels of service indicate no manpower impact:

- a. Minimum response rates.
- b. Minimum manpower levels.
- c. Standardized crew complements.
- d. Safety considerations.
- e. Aircraft turn-around time.
- f. Length of waiting periods.
- g. Levels of backlog.
- h. Hours of operation.
