

**Technical Order  
MAINTENANCE DATA COLLECTION**

T.O. 00-20-2, 1 May 2000, is supplemented as follows:

4-24.2. Units may use indirect labor reporting codes. The option to assign the last two numerical positions of the indirect labor unique data codes is delegated to the LG in order to differentiate types of indirect labor expenditures.

6-3.3. At this time the option to implement event consolidation for on and off equipment is not authorized.

7-2.1.3. (Added). (ANG) A seven-character data code beginning with the alpha character G and two numerical characters designating the fiscal year, will be assigned and published by ANG/LGM for the reporting of all ANG approved and directed modifications. Command directed one-time inspection data codes will also be seven characters, beginning with the alpha character S (to denote special inspections) and two numerical characters designating the fiscal year. ANG/LGM will assign and publish these codes. Local one-time inspections may also be documented using a seven-character data code beginning with the alpha character L and two numerical characters designating the fiscal year. The remaining four digits of the data code will be determined by the LG.

7-3.3. A seven-character data code beginning with the alpha character P and two numerical characters designating the fiscal year will be assigned and published by ANG/LGM for the reporting of all command approved and directed engine modifications.

**APPENDIX A:**

A-1. Wings with more than one organizational maintenance unit and/or AGU on a base can only use alphanumeric codes. Assigned second-position workcenter codes for centralized maintenance units are:

- 1 - Logistics Group Commander or Equivalent.
- 2 - Operations Maintenance or Equivalent.
- 3 - Back Shop Maintenance.
- 4 - Avionics & Airborne Missile Maintenance.
- 5 - Munitions Maintenance.
- 6 - Ground C-E (includes chief of maintenance).
- 7 - Not assigned.
- 8 - Ground-Launched Missile Maintenance

and, assigned second-position workcenter codes for decentralized maintenance units are:

- 1 - Deputy Commander for Maintenance (Aircraft).
- 9 - Non-Reporting Workcenters.
- O - Away From Home Station Maintenance.
- G - First Aircraft Generation Squadron (AGS).

H - Second AGS.

E - Equipment Maintenance Squadron (EMS).

R - Component Repair Squadron (CRS).

Assignment of characters for use in the fourth position of the work center code is an LG option.

Assignment of character for use in the fifth position of the work center code is an LG option.
