Air Force Manual (AFMAN) 23-110, Volume 2, Part 2, Chapter 21, *United States Air Force Supply Manual*, 1 October 2004, is supplemented as follows. This publication applies to all Air National Guard (ANG) units. Send comments and suggested improvements on AF IMT 847, *Recommendation for Change of Publication*, through the Logistics Readiness Officer to (ANG/LGSP), 3500 Fetchet Avenue, Andrews AFB, MD 20762-5157.

21.118. (Added) Post Deployment Processing of L73 (Demand Data/Consumption/Transfer Collector) program. Redeploying units that transferred their RSP or established an account on another SBSS account must ensure the L73 program is scheduled and processed within ten days of returning to home station. The L73 program captures demand data from the deployed SBSS account for upload into the unit's (home station) SBSS. Deployed units will coordinate with the responsible Regional Supply Squadron (RSS), and/or the hosting supply account at the deployed site, to ensure the L73 is processed; demand data captured and uploaded in their home base SBSS account.

21.118.1. (Added) The following information (parameters) must be forwarded to the RSS of the hosting supply unit at the transferred/deployed site to process the L73:

- Date the unit arrived at the contingency site (yyyyddd, four digit year with the three-digit Julian date, exp. 2004091).
- Date the unit left the contingency site (four-digit year with the three-digit Julian date)
- SRD (Standard Reporting Designator)
- Contingency (deployed) site system designator
- Host (at home base) supply account system designator

- Organization code used at the contingency site
- The output FRR and FCL file will contain unit SRAN in the file name (exp. 1GV0*L73-FRR6482 and 1GV0*L73-FCL6482) 6482 in the example being your SRAN. The SRAN in the file name prevents overwritten files.

21.118.2. (Added) The home base computer operations section (or the applicable RSS) will receive the data files(s) from the contingency site to update the home base's item and repair cycle records.

21.118.3. (Added) Review the FRR and FCL files transferred from the contingency site before processing through the pseudo. Correct any rejects before processing other files.

DANIEL JAMES III, Lieutenant General, USAF
Director, Air National Guard
